This gorgeous house was custom built by the current owner. The house sits on almost an acre with a lot of privacy. Large refinished concrete front porch with room for your rockers!. The beautiful hardwood floors have recently been refinished. A large great room with a tray ceiling and a gas log fireplace create an inviting ambience. Many windows allow for natural light. An open kitchen with plenty of counter space, stainless steel appliances and a double door pantry. There is a built in desk space in the kitchen. The formal dining room has Travertine tile floors and is large and open with a pretty light fixture and chair railing. The master bedroom is separate from the second bedroom on the main level. The master suite has carpet and a tray ceiling with a ceiling fan and faces the trees in the back yard. An additional bedroom is on the main level with a second bathroom. There is a formal living room which can be a library or an office space with double French doors. The basement has two additional bedrooms, a large bonus room with access to the small deck out back. A third bathroom is in the basement along with a large storage room that is unfinished and perfect for all of your seasonal items. There is a three car garage along with a driveway all the way behind the house for additional parking and easy access to the basement if it is used as a mother-in-law suite. There is surround sound in the great room and on the upper deck.
